## **DETAILED ACTION**

### ***Specification***

Cancellation of claims 4, 16, and 46-49 in paper no.13, filed 10-5-01 is acknowledged.

### ***Claim Rejections - 35 USC § 102***

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-3, 5-7, 11-13, 15, 17, 38-39, and 41 are rejected under 35 U.S.C. 102(e) as being anticipated by Khandros (5,852,326). Khandros discloses in Figures 13 and 14, a semiconductor die (el.820) with a conductive bond pad (el.830), whose active surface is adhered to an interposer (el.838); an external terminal (el.848); an interposer (el.838) between said die and said external terminal, having at least one interconnect (el.856) coupling the die to the external terminal; a plurality of pieces of compliant, adhesive film (el.843; col.17 lines 45-62; col.18 lines 17-20) disposed in between and adhered to the die and interposer; and encapsulating material between the

die and the interposer (el.858). Khandros also discloses a flexible and compliant adhesive material (col.17 lines 45-51), comprising either a single layer of elastomer material (el.840; col.17 lines 55-58) or a carrier layer disposed in between two adhesive layers (col.22 lines 14-16).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Khandros as applied to claims 1-3, 5-7, and 11-13 above. However, Khandros does not disclose solder ball external terminals. Examiner takes Official Notice that solder balls are conventionally used in the semiconductor industry for the purpose of interconnecting a semiconductor package to an external connection, such as a printed circuit board, and would have been obvious to a person skilled in the art at the time of the invention.

Claims 9-10, 18, 40, and 42-45 are rejected under 35 U.S.C. 103(a) as being unpatentable over Khandros as applied to claims 1-3, 5-8, 11-15, 17, 38-39, and 41 above. However, Khandros does not disclose strips of compliant, adhesive film positioned in parallel to the die and at right angles to each other. Examiner takes Official Notice that the compliant, adhesive film masses of Khandros could be formed as strips, positioned in parallel to the longitude of the die, and inherently positioned at right

angles to each other, and is conventionally used in the semiconductor industry for the purpose of cutting and positioning fewer individual masses between the die and interposer but still providing space between strips, and would have been obvious to a person skilled in the art at the time of the invention.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-3, 5-15, 17-18, and 38-45 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

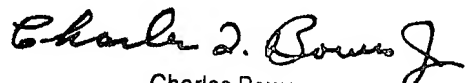

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
